Introduction to HTML - W3Schools What is HTML? HTML is the standard markup language for creating Web pages. HTML stands for Hyper Text Markup Language; HTML describes the structure of Web pages using markup.

HTML - Wikipedia Hypertext Markup Language (HTML) is the standard markup language for creating web pages and web applications. With Cascading Style Sheets (CSS) and JavaScript, it forms a triad of cornerstone technologies for the World Wide Web. HTML Layouts - W3Schools HTML Layouts Previous Next ... HTML Layout Elements. Websites often display content in multiple columns (like a magazine or newspaper). HTML5 offers new semantic elements that define the different parts of a web page: <header> - Defines a header for a document or a section. HTML Images - W3Schools The <picture> Element. HTML5 introduced the <picture> element to add more flexibility when specifying image resources.. The <picture> element contains a number of <source> elements, each referring to different image sources. This way the browser can choose the image that best fits the current view and/or device. Each <source> element have attributes describing when their image is the most.

HTML Links - W3Schools HTML Links - Create a Bookmark. HTML bookmarks are used to allow readers to jump to specific parts of a Web page. Bookmarks can be useful if your webpage is very long. To make a bookmark, you must first create the bookmark, and then add a link to it.
